SHRI SHARAD ANANTRAO JOSHI: Thank you, Mr. Chairman Sir. The Minister was quite right in saying that last year a restriction on purchase by private traders was removed and, therefore, the farmers got a good price. I have had occasion to compliment the Minister on that. This year the question is: why was it that restriction was put on private traders' entry into the market? We have enquired in Punjab and Haryana and found that the extra effort put in by Haryana was in the nature of giving instructions to Divisional Commissioners to ensure that private traders do not enter the market. The second part is: why was a ban put on taking open positions on Futures Market where farmers could have got a much better price? In fact, if that ban had not been put, the price that farmers could have got today...

MR. CHAIRMAN: Put your question. We are running out of time.

SHRI SHARAD PAWAR: There was only one Order issued by the Government of India. The Order was, if any private trader was going to buy more than 50,000 tonnes, he had only to report—he was not banned—to the local Government agency that he had purchased such and such quantity. There was no other restriction. It is true that the Punjab Government or the Haryana Government has helped the Government of India in procurement. But they never introduced any restriction or put any ban on the farmer. So far as the second issue which has been mentioned here is concerned, in fact, that was the demand made in this very House that we should remove wheat from Futures Market. Government has appointed a committee under the chairmanship of Prof. Abhijit Sen to report whether we should continue the same policy or make any changes.
